

Curve Cubicle System

SPECIFICATION DATA SHEET

Bring a bold, modern aesthetic to a range of washrooms with the Curve Cubicle Range

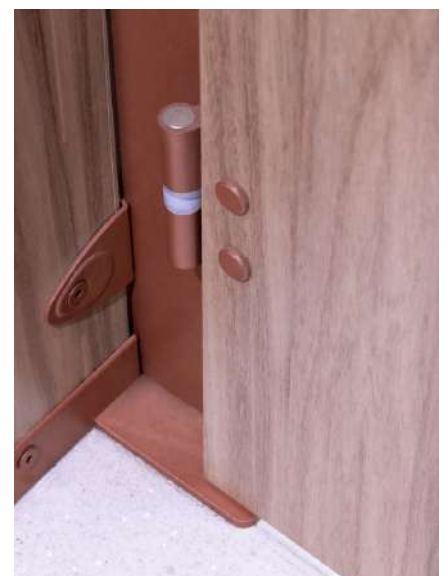

With its signature curved aluminium pilasters, Curve offers a dynamic solution, enhancing visual appeal while meeting the practical demands of high-traffic environments.

Powder coated to complement the panel colour, these sculptural details offer a seamless, high-end look that elevates the entire space.

Ideal for both toilet and shower cubicles, Curve is designed for durability without compromising on design impact - making it a standout choice for offices, leisure centres, hospitality venues, and premium public spaces.

Curve cubicles can be fabricated from 12mm Compact Grade Laminate (CGL), depending on the project's durability and design needs.

Also known as Solid Grade Laminate (SGL), this impermeable material offers excellent performance in high-traffic environments, with a strong resistance to impact, and persistent daily use.

Curve Cubicle System

STANDARD SPECIFICATION

Dimensions

Height	2000mm
Door Width	710mm
